

Case History NCP 259

Industry Sector

Food Processing – Brewery
– Medium Pedestrian Traffic

PROJECT NAME:
Kereru Brewery - Wellington

PROJECT REQUIREMENT:
When Chris, an American brewer from Boston decided to manufacture British style beers and ales he set up a bespoke built craft brewery in Wellington New Zealand.

This state of the art 1800 litre micro brewery not only produces traditional quality beers and ales but also "gluten free" ale called "Auro".

Chris also wanted to use the brewery to promote craft brewing by providing guest beer tasting events coupled with tourism visits.

The floor not only required functionality so as to withstand the rigors of the brewing industry, but high cosmetic appeal and be maintenance free.

NUPLEX Solution

Sureshield is an industrial grade floor topping system specifically designed for the food industry. Sureshield is highly versatile resin flooring system that has been in the industry for over 40 years.

Sureshield resin is blended with specially graded silica quartz aggregates to produce a floor system that is hard and durable, non-slip, resistant to impact, abrasion, thermal shock and chemicals/food acids, yet is non porous seamless, hygienic and easily cleaned.

Sureshield is able to be formed into coves and drains and is perfectly suited to the conditions of a brewing facility.

Sureshield is fully bonded to the concrete to prevent water creep.

Nuplex Sureshield is the choice of many manufacturers who require a little or no maintenance for many years.

Product: Nuplex Sureshield - Coloured®

Size: 220m²

Contractor: B M Scott Ltd - Levin

Specifier: In House Brewer

Project Manager: In House Brewer

Completed: May 2013
