

# Case History NCP 261

Industry Sector

Food Processing – Honey

– Medium Pedestrian Traffic

## PROJECT NAME:

## PROJECT REQUIREMENT:

Nelson Honey produces a range of products for the Asian, America & Great Britain markets and in doing so they are required to meet certain hygiene requirements.

Nelson Honey researched their options which included talking to various food manufacturers and decided that Nuplex could offer a solution to meet their requirements

Odourless installation, forming of coves, easily cleaned yet with a degree of non-slip along with the usual high durability and low maintenance requirements were requested for this facility.

## NUPLEX Solution

Supascreed is an industrial grade floor topping system specifically designed for the food industry. Supascreed is highly versatile resin flooring system that has been in the industry for over 30 years.

Supascreed resin is blended with specially graded silica quartz aggregates to produce a floor system that is hard and durable, Non-slip, resistant to impact, abrasion, thermal shock and chemicals/food acids, yet is non porous seamless, hygienic and easily cleaned.

Supascreed is able to be formed into coves and drains and is perfectly suited to the conditions of a working honey processing plant.

Supascreed is fully bonded to the concrete to prevent water creep.

Nuplex Supascreed is the choice of many manufacturers who require a no –odour installation whilst meeting all the requirements with little or no maintenance for many years.

**For further information on our range of solutions**

**Product:** Nuplex Supascreed®

**Size:** 120m<sup>2</sup>

**Contractor:** CG Coatings Ltd

**Specifier:** Nelson Honey

**Project Manager:** Nelson Honey

**Completed:** April 2013
