Industry Sector

Food Preparation - Kitchen

– High hygiene and impact resistance

PROJECT NAME:
Ngatokawaru Marae-

PROJECT REQUIREMENT:

Durability, impact resistance and bright.

Ngatokawaru has many an occasion where the food requirement is high hence the kitchen needed to be easily maintained so as to keep the area clean and hygienic.

They were looking for a system whereby joints in the wall cladding sheet were minimal or non-existent.

The Nuplex Contractor and in this case was also the builder put forward Nuplex Formwall as the obvious solution.

NUPLEX Solution

Nuplex Formwall was recommended due to the versatile nature of the product.

Formwall is smooth and impact resistant. It may be thermoformed around corners and welded so as to eliminate unsightly joints thus providing aesthetic appeal, whilst exhibiting excellent hygienic requirements

Formwall may be used in many and varied situations where a smooth hygienic surface is required yet provides cosmetic appeal.

Formwall may be used in conjunction with the Nuplex Flooring systems that will then provide an entire package that is not only durable but will require little or no maintenance for many years.

Product: Nuplex Formwall®

Size: 130m²

Contractor: B M Scott - Levin

Specifier: Southern Hospitality

Project Manager: B M Scott

Builder: B M Scott

Completed: August 2012
