

Case History NCP 258

Industry Sector

Food Processing – Fish
– High Pedestrian Traffic

PROJECT NAME:
Sealord – Pelagic Area - Nelson

PROJECT REQUIREMENT:
The Pelagic project had a very tight time constraint due to the timing of fish arrival at the plant.

As this is only one section of a fully operational facility with limited shutdown periods the installation had to be undertaken whilst the rest of the plant was in full production mode.

Odourless installation and a fast handover were critical elements in the choice of the flooring system along with the usual high durability and low maintenance requirements for a facility of this nature.

NUPLEX Solution

Sureshield ZV is an industrial grade floor topping system specifically designed for the food industry. Sureshield is a highly versatile resin flooring system that has been in the industry for over 40 years. The Sureshield ZV system is the latest edition to a very successful and well proven range of products.

Sureshield ZV resin is blended with specially graded silica quartz aggregates to produce a floor system that is hard and durable, Non-slip, resistant to impact, abrasion, thermal shock and chemicals/food acids, yet is non porous seamless, hygienic and easily cleaned.

Sureshield is fully bonded to the concrete to prevent water creep.

Nuplex Sureshield is the choice of many manufacturers as it provides all the requirements with little or no maintenance for many years

Product: Nuplex Sureshield ZV®

Size: 440m²

Contractor: Construction Coatings Ltd

Specifier: Sealord

Project Manager: Sealord

Completed: February 2013
