

SURFAGLAZE

PURPOSE:

A long life, high performance decorative coating system for application to residential and commercial structures subjected to severe U.V. attack, dirt polluted atmosphere and moderate chemical contamination where very low maintenance is a requirement.

PROPERTIES:

- Specially formulated water dispersed basecoat and a two pack acrylic Urethane enamel top coat utilising various sealers
- Good re-coatability
- Excellent resistance to soiling and contains sophisticated U.V. protective additives to resist ultra violet radiation attack
- Excellent colour-fastness
- A range of modern design colours
- Weather resistant
- Contrast in finish may be achieved with pretexturing

SUGGESTED USES:

- As a superior high gloss finish to most building surfaces (semi-gloss available)
- Interior/Exterior light traffic application.
- Protective/Decorative coating for the maintenance of roofs constructed of fibre cement sheeting, clay, metal and concrete tiles. It is used with particular effect over substantial surfaces such as precast or in-situ concrete and concrete plaster with a smooth finish.
- Topcoat used as impervious wall coating on metal insulation claddings
- Deck coatings
