Floor to Wall Junction Detailed With Alsan Flashing

Fully Adhered Double Layer System With a Fillet

Prior to Membrane Installation, Review the Data Sheet

Surface Prep

It is the contractor's responsibility to inspect all areas which are to receive the waterproofing membrane and report any unsatisfactory conditions to the main contractor. Refer to the technical data sheet for detailed specifications for preparing various substrates.

The surface to be waterproofed must be clean and sound. Remove all dust, dirt, laitance or any other contaminants which may hinder adhesion of the membrane.

Special Notes

Reinforce every transition and angle change. Alsan Flashing is self-terminating, no additional termination is required.
